OPERATING THROUGHOUT  
THE UK, SPECIALIZING IN  
WEDDING ENTERTAINMENT  
AND IN PARTICULAR THE  
EVER-GROWING POPULAR  
PHENOMENON OF THE  
SILENT DISCO

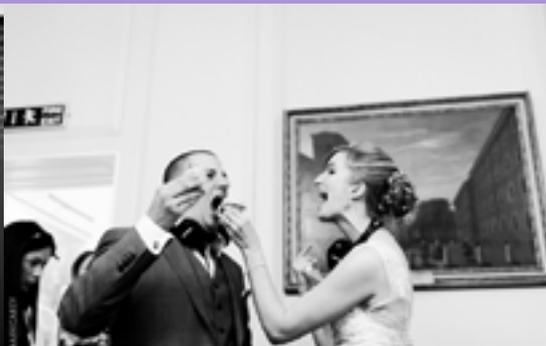

‘Duncan and Darren are massively on the ball, so easy to work with and made our night. Way to top off the wedding into the dead of night without driving the neighbours crazy! We had every guest asking where we found you guys for the next party. A massive testament to how seamless you made the evening and how functional and fun the headsets were. We honestly can’t thank you enough.’

# WHAT IS A SILENT DISCO?

A silent disco has much in common with a regular disco or party, with one noticeable difference... there's no music! That is until you put on a pair of Silent Noize headphones and share in the experience of listening to up to 3 DJs or playlists playing at the same time. But don't worry, there's no horrible sound clash! Each pair of headphones has 3 channels chosen by a simple switch on the side of the headset, allowing you to choose your preferred choice of DJ/music.

The experience is mind blowing! A space full of people sharing the same dance floor, singing at the top of their lungs and dancing in apparent silence to different songs. Then if you fancy taking a break from the music there is no need to leave the room - simply drop your headphones down for a second and talk to your friend as you would in a normal quiet room. It's truly a unique experience and is fascinating to watch too!

‘Silent Noize is great for all ages; Kids love the novelty and adults love the choice’

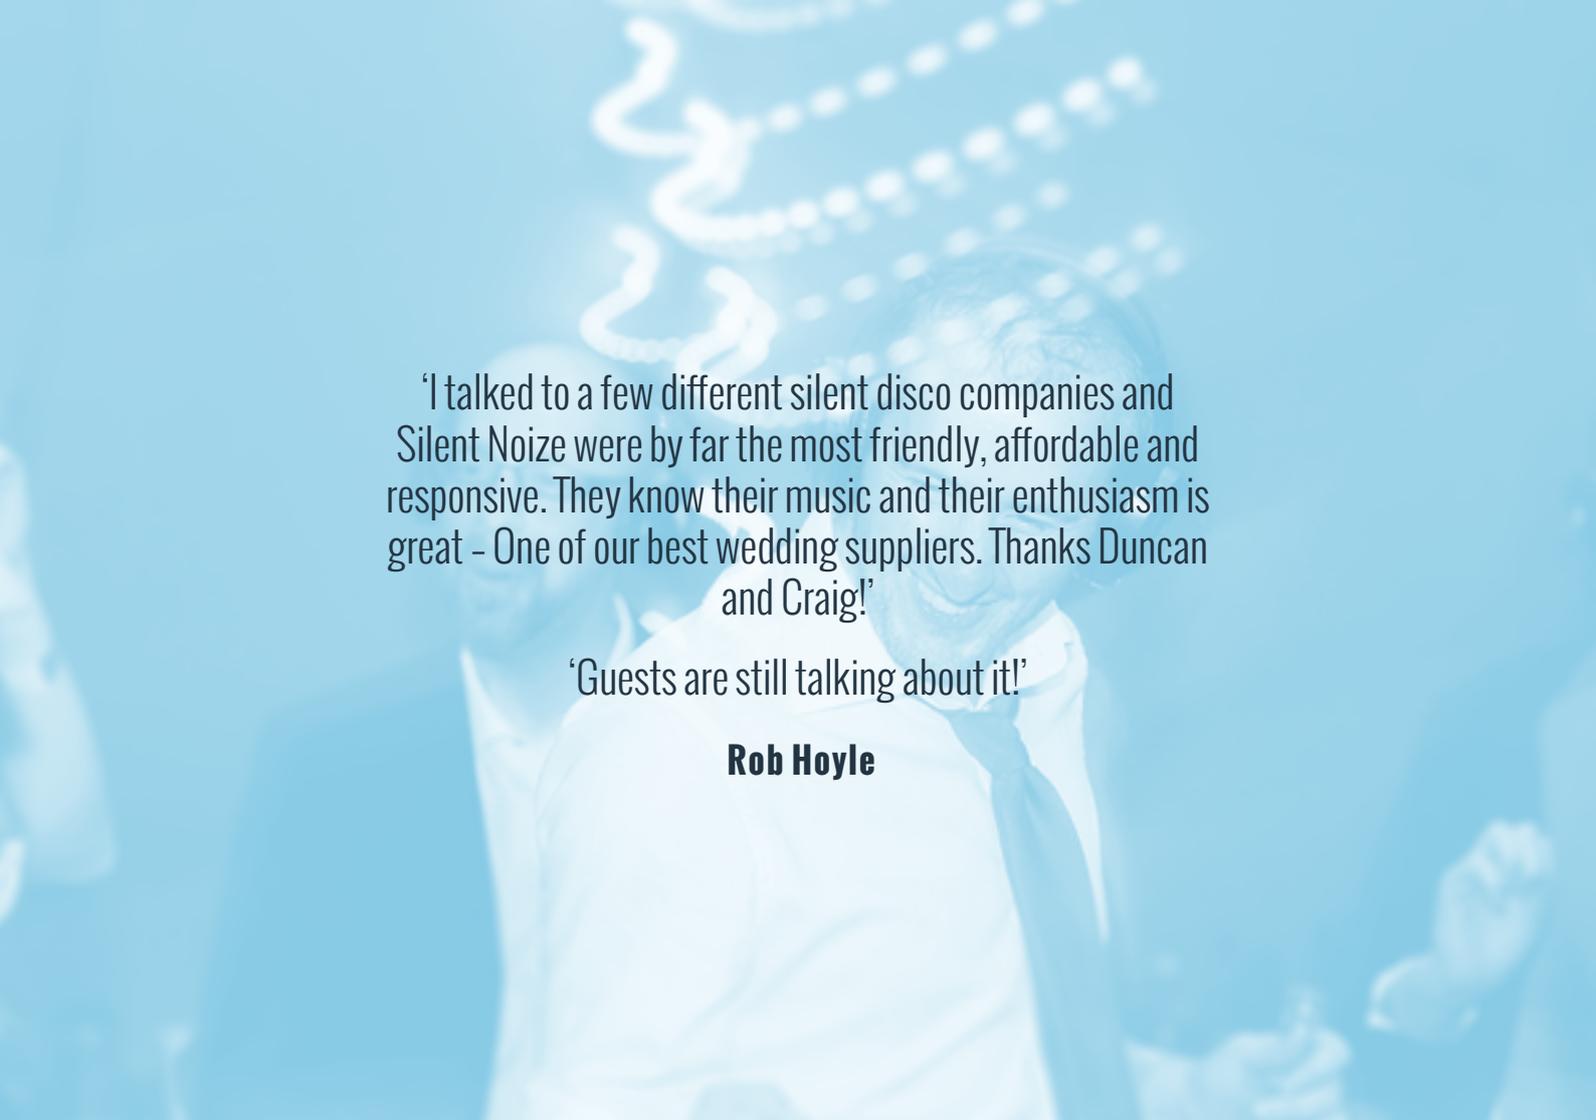

**Peter Hughes**

‘Hired the silent disco for my wedding. From my initial enquiry to the booking itself, the service has been outstanding. Any problems or queries, Duncan is happy to assist. I had a range of people at my party from 4 year olds right up to 80 year olds and each person loved the experience and fully got into the swing of it. I will definitely be recommending Silent Noize to anyone I know and will be using it myself again. Once again thank you for the amazing service!’

‘Our venue had told us that amplified music needed to be stopped at midnight, so we wanted an option to keep people dancing afterwards, as many of our guests were staying on site. The silent disco was absolutely AMAZING! We started it after the DJ at 10pm. Our guests were still dancing (on tables) until 3.30am. We had a ‘Golden Oldies’ channel, a ‘Northern Band’ channel and a ‘Dance’ channel, so there was something for everyone.’

‘Epic’

**Lou & Lee Stedman**

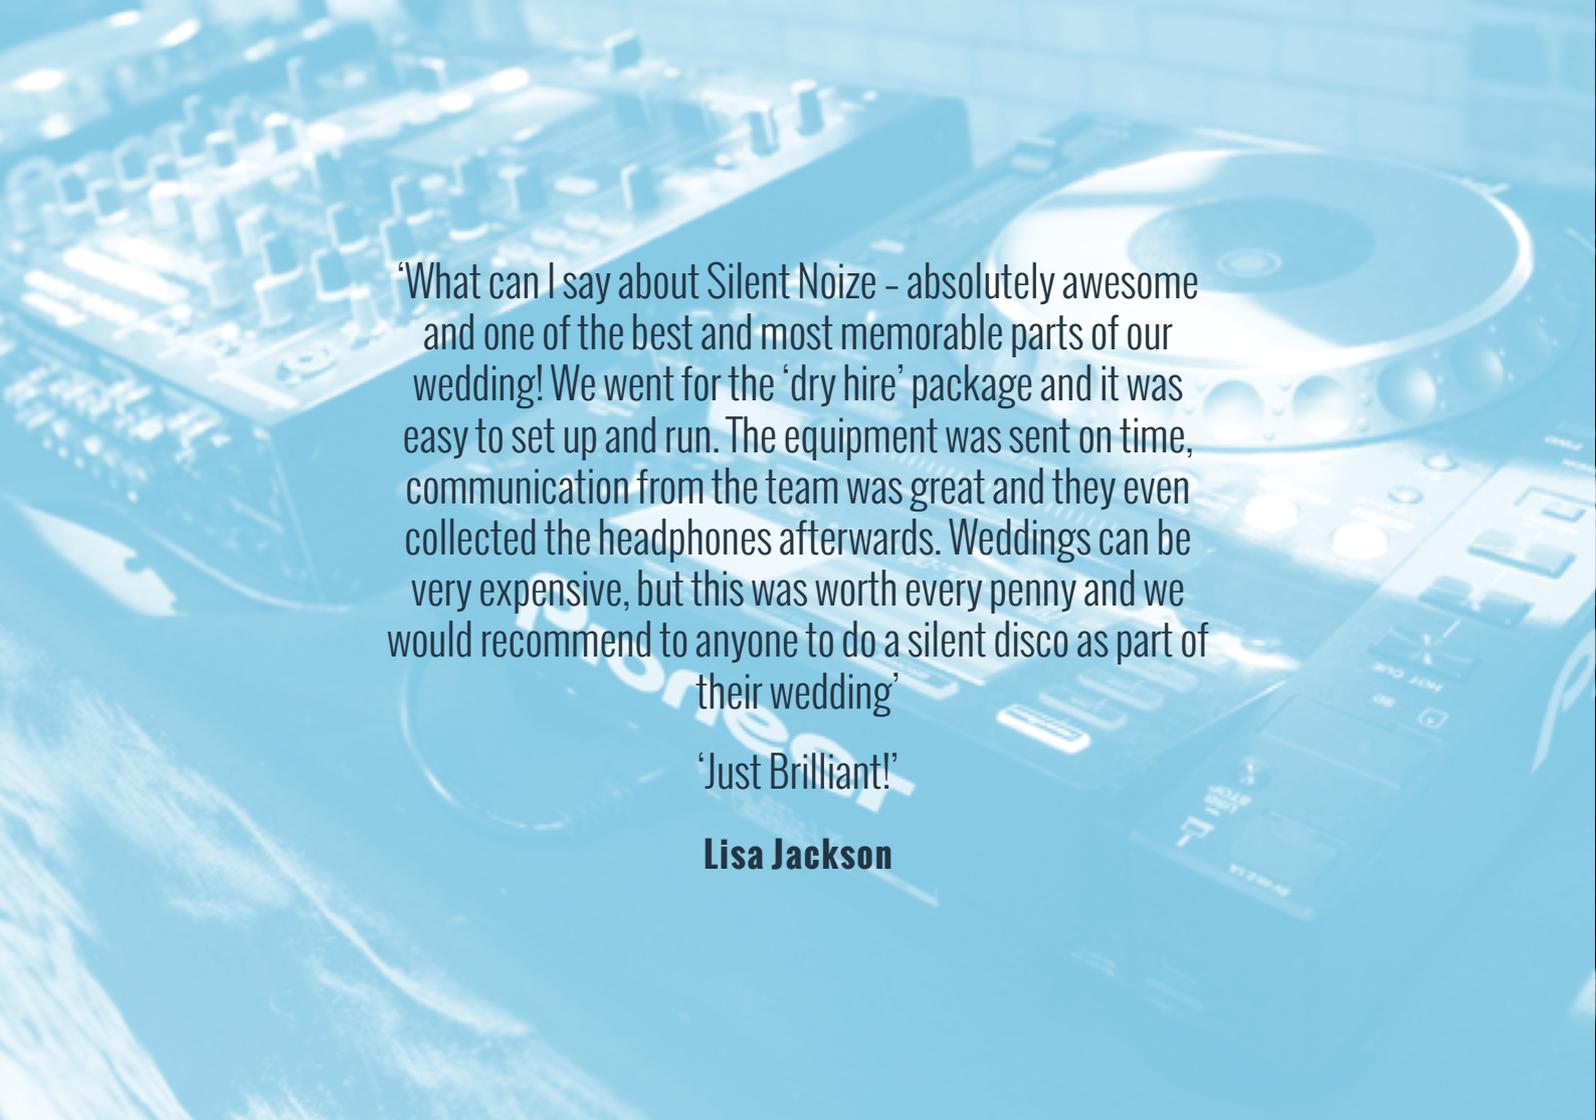

# THE SOLUTION TO NOISE RESTRICTIONS

We find that with many weddings the party often has to end early due to noise restrictions at the venue or complaints from local residents. With a Silent Noize silent disco you can carry on the celebrations into the early hours of the morning without disturbing anyone - perfect for hotels, residential areas etc.

The biggest advantage of a silent disco is that it can take place virtually anywhere.

The set up is minimal with very low power requirements and there is no noise pollution as no actual music is being transmitted through speakers. Silent Noize have held silent discos in a host of locations including: hotels, restaurants, function halls, gardens, forests, warehouses, festivals as well as nightclubs, pubs, bars, at house parties and even in a library! The limits are truly endless.

‘What can I say about Silent Noize - absolutely awesome and one of the best and most memorable parts of our wedding! We went for the ‘dry hire’ package and it was easy to set up and run. The equipment was sent on time, communication from the team was great and they even collected the headphones afterwards. Weddings can be very expensive, but this was worth every penny and we would recommend to anyone to do a silent disco as part of their wedding’

‘Just Brilliant!’

**Lisa Jackson**
